

6516209387.txt

This is outrageous Instant weather and Traffic should be something that the establishment should applause. Vacationers, truckers, police, and fire could use the traffic information to make a speedy response to emergencies as well as a means of not being a part of the problem for responders. to safely find alternate routes in situations caused by weather related problems such as flooding or accidents. Times are changing so should the NAB instead of trying to stop change they should find ways to use change
